Getting started guide

Everything you need to use your MAHU card, screen by screen.

EN · FRONT · STEPS 1 TO 6

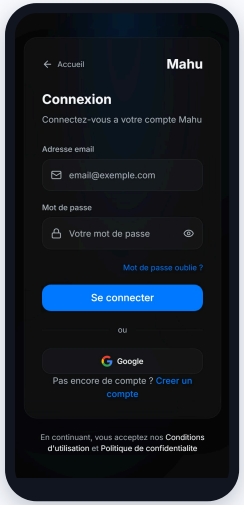

Your login

Website	**call.mahu.cards/login**
Username	**your email address**
Temporary password	`mahu1234@`

⚠ **The first time you log in, MAHU asks you to replace it with your own password.**

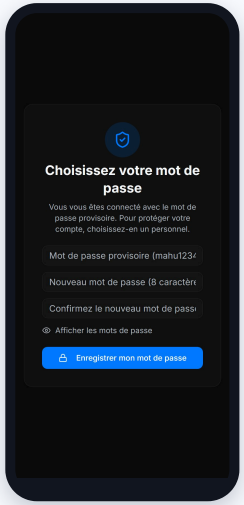

Later: **Paramètres** → **Changer le mot de passe** (Settings → Change password, a link arrives by email).

Scan to log in

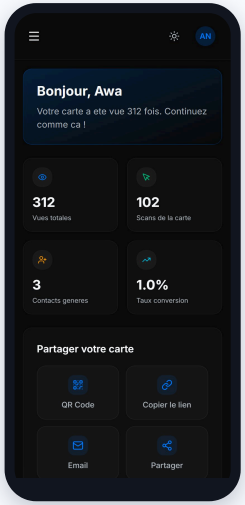

1 Log in

Open **call.mahu.cards/login**. Enter your **email address** and the temporary password **mahu1234@**, then tap **Se connecter** (Log in).

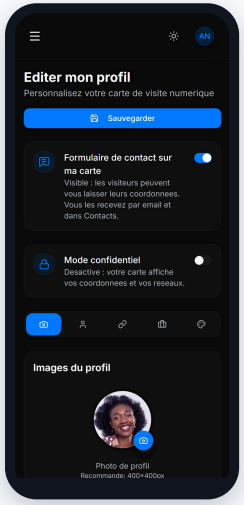

2 Choose your password

The first time you log in, MAHU asks you to choose your own password: type **mahu1234@**, then your new password twice (at least 8 characters).

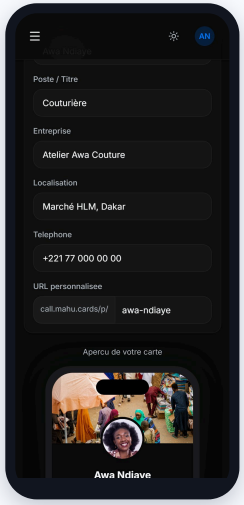

3 Your dashboard

See how many people viewed your card, the card scans and the contacts received. The ☰ menu at the top left opens every page.

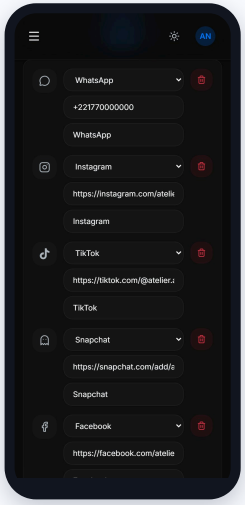

4 Your photo and cover

Menu **Mon Profil** (My profile), **camera** tab: tap the small blue button to add your photo, then your cover image.

5 Your details

Person tab: your name, job, company, location and phone. Tap **Sauvegarder** (Save) at the top of the page. **Palette** tab: your card colour.

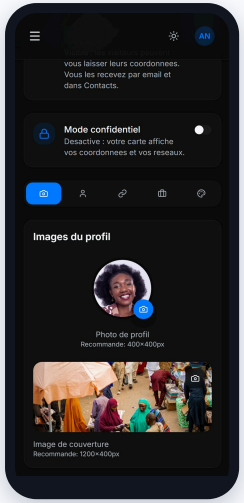

6 Your social networks

Link tab → **Ajouter** (Add): pick WhatsApp, Facebook, Instagram, TikTok, Snapchat, YouTube, LinkedIn, X, Telegram… paste your link and **Save**. The icons appear on your card.

Turn the page →

Getting started guide

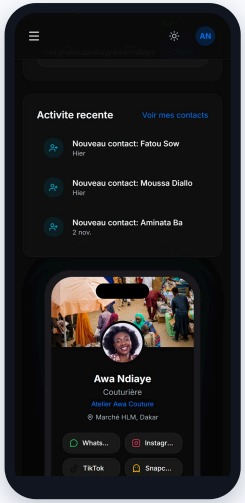

7 Contact form & private mode

At the top of **Mon Profil**: the **contact form** lets visitors leave their details. **Private mode** hides your number: people write to you and you choose whom to call back.

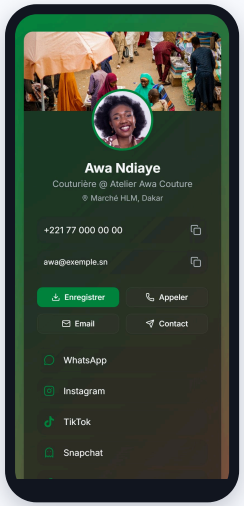

8 Your services

Briefcase tab → **Ajouter un service** (Add a service): write what you offer (e.g. « Sea freight China → Senegal », « Car rental ») with a detail: price, delay, area. They appear on your card.

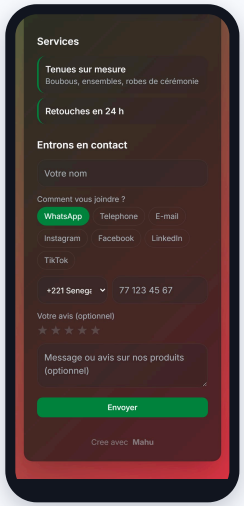

9 Share your card

Hold your card near your contact's phone (NFC) or let them scan the QR code. On the dashboard, **Partager votre carte**: QR code, copy link, email.

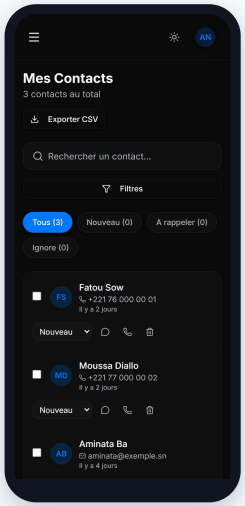

10 What your clients see

Your card opens on their phone: photo, job, number, **Enregistrer** (save contact), **Appeler** (call), and your networks in one tap.

11 They can write to you

At the bottom of your card, the client leaves their name, WhatsApp or phone and a message. You receive it by email.

12 Your contacts

Menu **Mes Contacts**: every message received, with the number. Filter « Nouveau » (new), « À rappeler » (to call back), or export the list (CSV).

Good to know

- Change your number or networks at any time: the card stays the same.
- Android: turn on NFC in settings. iPhone: hold the top of the phone near the card.
- Lost your card? Call us: we block it, your profile stays safe.

Which phone? NFC and QR code

Your card opens in two ways: by tapping it with the phone (NFC) or by scanning its QR code. Nothing to install, for you or for your client.

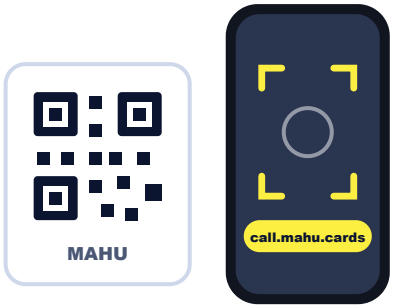

iPhone TAP THE TOP

- **iPhone XS, XR and newer** (11 to 17, SE 2nd generation and later): nothing to turn on. With the screen on and unlocked, hold the **top of the iPhone** near the card. A notification appears: tap it.
- **iPhone 7, 8 and X**: open Control Center and tap **"NFC Tag Reader"**. Not there? Settings → Control Center → add it.
- **iPhone 6 and older**: no NFC. Use the QR code.

Android TAP THE BACK

- Most Android phones have NFC (Samsung, Tecno, Infinix, Itel, Xiaomi, Oppo, Huawei...). A few entry-level models do not.
- **To turn it on**: swipe down from the top of the screen and tap the **NFC** icon (it turns blue).
- **No icon?** Open **Settings**, type "NFC" in the search bar and turn it on. Samsung: Connections → NFC and contactless payments.
- **Where to tap?** On the back of the phone, in the middle or slightly higher. Hold the card flat for 2 seconds.

QR code WORKS EVERYWHERE

- No NFC? The QR code works on every phone with a camera.
- **iPhone**: open the Camera, point at the QR code, tap the yellow link.
- **Android**: open the Camera or Google Lens, point at the QR code, tap the link.
- Your QR code is also on your dashboard: **Partager votre carte → QR Code** (Share your card), to show it on your screen.

It doesn't open?

- Phone unlocked, screen on.
- Remove a thick, metal or magnetic case.
- Don't move: card flat, 2 seconds.
- The card has no battery: it never wears out and never needs charging.
